## TECHNOLOGIES

### DROPSTITCH LIGHTWEIGHT

Dropstitch technology involves encasing thousands of polyester fibers between two layers of PVC. Under high pressure, the fibres are pulled taught, giving the board its strong rigidity.

### DOUBLE-LAYER DROPSTITCH

Stronger than the LightWeight Dropstitch technology, a second PVC layer covers the first, significantly increasing the rigidity, particularly for long boards.

# STAND UP PADDLE ZRAY

## THE MOST ATTRACTIVE COLLECTION OF THE SUMMER!

After first entering the paddle board market in 2013, today Poolstar is imposing itself as an essential player on the stand up paddle scene. Fun, easy and pleasant, the Stand Up Paddle (SUP) became quickly accessible thanks to the revolutionary inflatable technology: Dropstitch.

Without a doubt, the ZRAY range is the most attractive in the Stand Up Paddle market in 2018. It combines all the ingredients for success: extremely competitive pricing, design, performance, quality and, first and foremost, paddles to suit

all abilities.

## READY TO GO!

Delivered as a complete package: rucksack, high pressure pump and paddle - our boards stand out because of a unique design, a thickness of 15 cm, and their ability to transform into a kayak thanks to the optional seat.

In 2019, ZRAY is bolstering its collection and materials with even more specialised models — all offering the best value for money on the market!

## X-RIDER 9'9"

### THE UNIVERSAL SUP

The inflatable board Zray X-Rider 9'9" is a revolution in the Stand Up Paddle world!

The 15 cm thickness of this SUP, combined with its 297 cm length, provide exceptional stability, easy manoeuvring and a fluid and pleasant gliding motion.

## X-RIDER 10'10"

### THE ULTRA-MULTIPURPOSE SUP

The design of the SUP Zray X-Rider 10'10" was conceived to provide unprecedented paddle boarding pleasure. Longer (330cm), with a 15-cm thickness, this board provides paddler stability up to weights of 140kg! Stable, light, functional and multipurpose, this SUP is suitable for hours of use whether in calm or choppy seas.

## DRIFT

*THE HIGH PRESSURE KAYAK:  
100% DROPSTITCH*

Drop Stitch technology has allowed inflatable SUPs to match the performance of rigid boards. This same transformation is now available for kayaks, with inflatable versions available in Full Dropstitch.

The Zray Drift kayak offers very high performance and a unique gliding motion, all while remaining compact and easy to transport. Long (428cm) and wide (81cm), the idea behind the Drift was combined performance and comfort.

### BENEFITS

# coasto

## TECHNOLOGY

### THERMO TWIN SKIN® by Coasto

A revolution in the SUP market. Aware of the weight constraint engendered by the double layer construction, Coasto has developed a unique technology consisting of thermally fusing the two PVC layers. With Coasto, the two PVC layers are not now glued but thermo-welded together.

# COASTO STAND UP PADDLE

## HIGH TECHNOLOGY, DESIGN AND PERFORMANCE!

Coasto is a real sensation in the market for inflatable stand up paddles.

First of all, the brand studied all the components and construction methods of inflatable SUPs currently on the market, then consulted various engineers, technicians and riders in order to offer products that clearly stand out.

That basic research has resulted in two major points of differentiation:

1. Development of the unique **Thermo Twin Skin® technology**
2. Each board meets a specific recognised market requirement

Stronger and lighter, these new boards with their streamlined design are also sold in Premium packs with an outstandingly finished red anodised paddle, a double action pump, a Premium carrying case on castors and a leash.

With all these elements, Coasto presents a new concept to the SUP market with unbeatable value for money.

Coasto means strong and durable in french !

### SPEED AND MUCH MORE!

Fast and innovative, Turbo iSUP is tailor-made for competition. Designed with the ultimate Race SUP specifications, Turbo is offering more for true champions. Kick pad, professional graduation of the board and EVA pad with outstanding comfort and grip.

## CALYPSO

### ALL AROUND MULTIFONCTIONS

Developed with the current all-round SUP's standards, Calypso offers a unique thickness, combined with super-stiff TTS ® Technology, offers the perfect compromised between low volume and hard board. Versatile, this board is suitable for cruises, waves and initiation for paddlers up to 90kg.

## ODYSSEA

### UNIQUE COMBINATION

ODYSSEA 9'5" offers a unique experience in the wave thanks to its wild tail, combined with a moderate length - 9'5" / 290cm - and enlarged round rails - 32" / 81cm. Such combination creates a multi-function boards that will perfectly suit both.
